

Veinlite LEDX[®]

The Gold Standard in Sclerotherapy

Veinlite LEDX delivers clinically proven vein visualization technology, empowering sclerotherapy specialists and phlebologists to provide precise and effective vein treatments. Veinlite LEDX uses clinically proven transillumination technology to reveal underlying venous structures, including veins, valves, and bifurcations up to 6mm deep.

Why choose Veinlite LEDX

- Clinically proven Veinlite technology*
- Increased area of illumination
- Widest opening for sclerotherapy treatment
- Improves sclerotherapy outcome
- Effective on all skin tones
- Meets INS and CDC Guidelines for infection control
- FDA and CE registered
