Veinlite R®

Improves Vein and Artery Access in Animal Research

Veinlite R is designed to simplify venous and arterial access in mice and rats. With Veinlite R, technicians can identify veins and arteries instantly, taking the guesswork out of routine procedures. The included tail adapters help stabilize and secure the tail during access. This innovative device features three light colors: orange for veins, green for arteries, and a white examination light.

Simple, affordable, and effective – technicians will see an immediate improvement in successful sticks with Veinlite R.

Why choose Veinlite R

- Designed for use on mice and rats
- Find and access veins and arteries easily
- Simple, one-handed operation
- Small and compact design
- Three levels of brightness
- Multifunction device and adapters provide versatility
- Meets INS and CDC Guidelines for infection control
