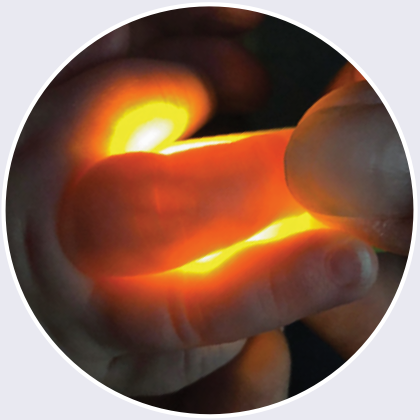
Veinlite NEO®

The Only Clinically Device on the Market Design for Finding Veins and Arteries in Neonates



Veinlite NEO is a clinically proven neonatal vein finder designed for use on newborns and infants (under 8 weeks). With its unique combination of through-the-body transillumination, adjustable color, and light settings, Veinlite NEO is the ideal tool for providing venous access in the NICU. Its compact design makes it easy to hold and use on even the smallest of neonatal patients. By helping healthcare professionals quickly locate veins and arteries in neonates, Veinlite NEO can help reduce the time it takes to perform difficult IV insertions. Veinlite NEO is the ideal solution for vein and arterial sticks in newborns.

Why choose Veinlite NEO

- Clinically proven Veinlite technology*
- Fewer IV access failures
- Designed for newborns
- Small and compact design
- Three levels of brightness
- Detects veins and arteries
- Meets INS and CDC Guidelines for infection control
- FDA and CE registered
